Silicone Dipped Glass Tube Supports

Sili-Grip®

- ◆ Grips tying during installation to prevent rotation (horizontal rolls) and sliding (w/ vertical tubing)
- ◆ Provides cushioning during transit and in installed locations subject to vibration (i.e., close proximity to retail doors)
- ◆ Allows for future ease of servicing of sign (will not adhere permanently to tubing like wet silicone applied at point of installation)
- ◆ No need to sacrifice strength of glass to gain some cushioning
- ◆ 3 models introduced initially, more models may be released pending customer demand
- ◆ Silicone is clear, making it virtually invisible – will not detract from the look of the sign

Description	Part #	Catalog #	Packaging	Weight
Silicone Dipped - Glass Tube Support, 1 3/4" - Brass Base	38768	TS#12-S	500 per box	14.5 lbs./box
